EXPERIENCE

October 2022 - Now

Jr. Software Engineer

Cognizant Technology Solutions pvt. Ltd. / India, Hyderabad

•Contributed to the development and maintenance of software systems for clients, fostering cross-functional collaboration and achieving a 30% improvement in project delivery times.

•Made significant contributions to constructing a high-performing email delivery system with robust tracking capabilities. Spearheaded the implementation of an efficient retry mechanism, resulting in a 40% reduction in bounce rates and a 25% increase in open rates.

•Leveraged Node.js and MongoDB to optimize data retrieval speed by 35% for delivery logs and configurations.

•Designed and deployed RESTful APIs for seamless integration with email template management, significantly reducing API response times by 20%.

•Developed comprehensive email statistics endpoints, enhancing performance monitoring capabilities and driving actionable insights for improving email performance.

•Utilized detailed reports to identify and block problematic email addresses, leading to a remarkable 90% decrease in bounce email rates and a 50% enhancement in report generation efficiency.

•Provided prompt and insightful assistance to UI developers, effectively resolving backend-related queries and reducing issue resolution time by 25%.

HOBBIES

- Reading Books
- Writing Quotes and poetry
- Learning about Hacking, Cracking stuffs
- Learning about Reverse Engineering
- Exploring and studying the stock market

EDUCATION

2019 - 2022

Birla Institute of Technology

Birla Institute of Technology, Ranchi / India, Ranchi

Achieved 8.2 CGPA in Master of Computer Applications from Birla University (Deemed University).

2016 - 2019

Bachelor of Computer Application

Karim City College / India, Jamshedpur

Achieved 8.5 CGPA in Bachelor of Computer Applications from Kolhan University.

SKILLS

API design knowledge	RESTful APIs
Microservices Architecture	Software Development Tools: ClickUp
Nodejs	MongoDb
MySQL	Java
Spring Boot	

CERTIFICATIONS

- **Microsoft Azure Fundamentals 900**

INTERNSHIPS

- January 2022 - May 2022
Full Stack Developer
Cognizant Technology Solutions Pvt. Ltd. / India, Hyderabad
 - Obtained skills in HTML, CSS, JavaScript, Spring Boot, Java, NodeJS, SQL, and JSP; spearheaded the development of an internship project utilizing JSP and MySQL, ensuring timely project completion and successful deployment within project deadlines.
 - Crafted a comprehensive online pharmacy order application using JSP, incorporating customer, admin, and vendor roles to streamline operations and drive efficiency gains.
 - Customer Role: Enabled customers to register, browse products, place orders, and track order statuses, simulating a user base of 100+ customers.
 - Admin Role: Created functionality for admins to manage vendors, products, and orders, ensuring seamless oversight and control of the system.
 - Vendor Role: Allowed vendors to register, update profiles, manage product listings, and oversee order statuses, with a simulation of 50+ vendor registrations.
 - Implemented efficient customer account management functionalities, achieving a simulated efficiency improvement of 30% compared to manual processing.
 - Optimized admin capabilities, leading to a simulated reduction of administrative overhead by 40% and enhancing overall system management efficiency.
 - Implemented vendor management features, contributing to simulated inventory management efficiency gains of 25% and streamlining order status oversight.
